OFFICE OF THE ADMINISTRATOR

MAY 20 1971

Refer to:  
GS-30

Mr. L. E. Nunnally  
Regional Director  
Property Management and Disposal  
Service, Region 3  
General Services Administration  
Washington, D.C. 20407

Dear Mr. Nunnally:

As a result of the many conferences held between your Administration and officials of the Federal Highway Administration, we are submitting the enclosed report of excess property covering 300 acres of land located at the Fairbank Highway Research Station, McLean, Virginia.

It will be noted that the description of land to be retained by FHWA is approximate and that final boundary lines can be established only upon completion of an on-the-site engineering survey. We shall be glad to furnish any assistance we can in accomplishing the survey.

In the event any questions should arise regarding the conditions set forth in the report, we would appreciate your contacting us.

Sincerely yours,

Executive Director
